No claims cashback! in respect of cases where premium is over £2k

THE ECV & SHIELD

Engineering Drawing Example

ECV - Electronic Coded Valve® (Diesel Smart-Valve) & Shield

IMMOBILISATION TRACKING

1. ECV® SMART-VALVE IMMOBILISATION SYSTEM

Operates by FoB or/and Keypad. The ECV® shuts-off the diesel fuel supply, hydraulics and machine electrics - automatically every time the engine is switched off. Touch valid FoB off Reader or enter valid Keypad PIN Code and start machine.

2. ECV® IMMOBILISATION TRACKING SYSTEM

The ultimate Security & Asset Management Green Footprint System: reduces the daily operating cost of your safe and secured plant. Operates by Tracker Comms-Keypad. The plant manager views and controls his secured and safe fleet globally from his desk by sms text, pc or iPhone app. He deletes or adds Keypad PIN codes, User and machine data is logged and retrievable.

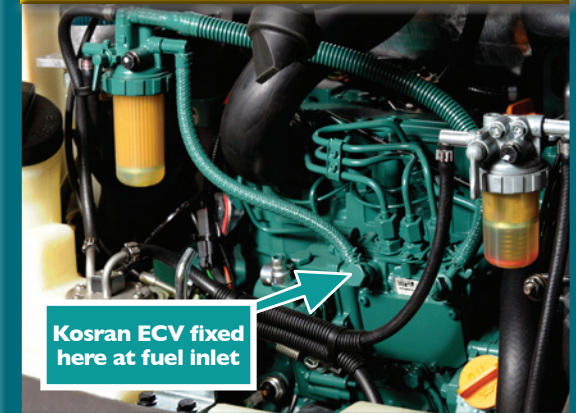

3. KOSRAN TRACKING & REPORTING SYSTEM (with iPhone, android etc app)

Designed for stand alone generators, tower lights etc. Superb instant 24/7 global roaming reporting system with every utilisation feature, track, trace geo-fence alarm and more.

NEW

VULNERABLE

The ECV is fixed here at fuel pump engine inlet protected by a security shield. The supply of fuel to the engine is controlled by the ECV which is managed from the Comms Keypad.

THE KEYPAD

ECV Comms Keypad™ The ECV® Comms Keypad can be operated manually or by pc or sms text remotely to immobilise plant. You can add or delete a valid keypad PIN Code globally.

SECURED

Kosran Secured. The ECV® immobilises the fuel supply, hydraulics & electrics. It is impossible for thieves to hot-wire and electrically bypass the Kosran ECV®

Kosran controls machines globally with a text...

Immobilisation + Safety + Utilisation Systems

...it is impossible... to hotwire the Kosran ECV Diesel Immobilisation Tracking System.

SAFETY & UTILISATION SYSTEM

4. SAFETY ACCESS CONTROL SAC FoB & Keypad Systems

Prevents death and injuries amongst people working at height. Stops unauthorised machine use and damage by juveniles. Contains exposure to safety insurance claims.

5. SAFETY & UTILISATION COMMS KEYPAD SYSTEM

Same features as 2 & 4 above, global remote machine control delivers a multitude of utilisation benefits, you are 100% in control; of your fleet. Track, trace, immobilise, view machine hours idle/worked, manage, service and audit 24/7 globally from your desk and much more.

6. FREE PLANT REGISTRATION

The ERA estimates €1bn plant stolen pa. UK Police recover 1%. Trackers recover 7%. Kosran had zero machines stolen in 2011, 2010, 2009 etc.,
